

Comparing MyChart Bedside and MyChart

MyChart Bedside at Cincinnati Children’s is a tool that allows families to see real-time information about the patient’s hospital stay. MyChart is like MyChart Bedside. It offers an online version of part of the patient’s electronic medical record. Not all things can be seen through MyChart like they can through MyChart Bedside when the patient is in the hospital. Most things related to the patient’s clinic care can be seen through MyChart.
