Cincinnati Children's

Shared Decision Making Process Chart – DRAFT

Developing Decision Aids & Implementing Shared Decision-Making (SDM)

Tasks	Team Members	Week											
		1	2	3	4	5	6	7	8	9	10	11	12
Identify clinical decision with >1 medically reasonable option with differences that matter to families	Clinical QI team* QIC* Outcomes Manager EBDM team*												
Directly observe current process of decision making and map within flow of care for child with condition	Clinical QI team QIC												
Identify system strengths that can be leveraged during SDM implementation *(e.g. pre-visit planning, etc.)*	Clinical QI team QIC												
Identify benefits likely to accrue from reliable implementation of SDM to define measurement strategy	Clinical QI team QIC Outcomes Manager EBDM team												
Complete Evidence Request Form including PICO question, and relevant data on current practice	Clinical QI team QIC Outcomes Manager EBDM team												
Summarize evidence on potential benefits, harms, and uncertainties of relevant options	Clinical QI team QIC EBDM team												
Draft prototype decision aid and refine through actual use	Clinical QI team QIC EBDM team												
Conduct PDSAs for SDM process including decision aid and directly observe new process	Clinical QI team QIC EBDM team												
Apply prioritization criteria to determine level of IS/EPIC support to hardwire SDM process and outcome measurement	Clinical QI team QIC EBDM team												
Develop work plan with timeline for IS/EPIC/PRO build to include PRO via tablets or at home; web delivery of decision aid to prepare families for visit	Clinical QI team QIC EBDM team IS/EPIC/PRO*												

**Clinical QI Team* – ideal is multidisciplinary team with representation from all clinicians that contribute to child's care, parents of patients, and to the extent possible patients themselves

**QIC* – Quality Improvement Consultant

**EBDM team* – Evidence-Based Decision Making team

**PRO* – Patient-/parent- Reported Outcome
