Cincinnati Children's Center for ADHD

The Cincinnati Children's Center for ADHD was established in 2005. We are a multidisciplinary collaboration between the Divisions of Behavioral Medicine and Clinical Psychology, Psychiatry, General and Community Pediatrics, and Developmental and Behavioral Pediatrics.

We are committed to:

- conducting research to improve the diagnosis and evidence-based treatment of ADHD
- offering cutting-edge diagnostic and clinical services to the greater Cincinnati community
- providing clinical training to the next generation of researchers and clinicians in the area of ADHD.

The Center for ADHD is located on the Cincinnati Children's Oak Campus at 2800 Winslow Avenue, Suite 5200, Cincinnati, OH.

Clinical Services at the Center for ADHD

The Center for ADHD currently provides the following evidence-based services for the families of children and adolescents with ADHD:

- ADHD Evaluations
- *Understanding and Managing ADHD* parent groups for parents of children aged 6 to 12 with ADHD that provide parents with the information they need to better understand and effectively manage their child's ADHD-related difficulties.

- *Managing Frustration for Children with ADHD* group for children between the ages of 8 and 11 years (in third through fifth grades) who experience difficulties with frustration despite management of their ADHD
- *Academic Success for Young Adolescents with ADHD* group that teaches adolescents and their parents strategies to effectively manage the difficulties adolescents with ADHD often experience in meeting the increased demands and expectations of middle and early high school. (offered early in fall and spring semesters)
- Individual/Family therapy services for children with co-existing emotional difficulties

Get More Information

Learn more about our clinical services at our web site **www.cincinnatichildrens.org/adhd** or call the Division of Behavioral Medicine & Clinical Psychology Intake Office at (513) 636-4336 option #.

Opportunities to Participate in Clinical Research

The Center for ADHD is involved in a number of grant-funded research projects. These studies are designed to test new and innovative ways to evaluate and treat ADHD. Children and their families have the opportunity to participate in research studies, gaining access to new and potentially more effective interventions before they are available to the general public. If you are interested in learning more about participating in research at the Center for ADHD, please call (513) 636-6632.

Primary Care Provider Training Program

The myADHDportal Improvement Program helps primary care physicians incorporate *American Academy of Pediatrics* evidence-based guidelines for ADHD care into their process for assessing and managing their patients with ADHD.

Participating in the myADHDportal program provides a variety of benefits, including:

- Targeted, relevant training on the *American Academy of Pediatrics* guidelines for ADHD assessment and treatment
- Participation in an approved *American Board of Pediatrics* Part 4 activity for Maintenance of Certification (25 MOC points) activity with potential for additional credit in each licensure cycle
- 20.0 *AMA PRA* Category 1 Credits™
- Improved reimbursement for ADHD management services

If interested in learning more about this program, please call (513) 636-8764, or you can request additional information via e-mail at myADHDportal@cchmc.org
