New Technologies for the NICU

Friday, March 8, 2013

Cincinnati Children's Hospital
Sabin Auditorium
Location D1

Cincinnati Children's
Perinatal Institute

Course Description

This conference will provide NICU health professionals with a comprehensive forum to examine innovative technologies used in the NICU and explore how these technologies may impact future outcomes for infants.

Target Audience

This conference is designed for physicians, nurse practitioners, nurses, respiratory therapists, and other health professionals caring for critically ill neonates.

Learning Objectives

Discuss the usefulness of measurement of cardiac function indices in the management of sick neonates.

Describe the utility of a servo system to regulate oxygen saturations for the management of preterm infants.

Recognize how near infrared spectroscopy can be used to evaluate tissue oxygenation for multiple organs in infants.

Identify the breadth of patient care information that can be extracted from analyses of vital signs from routine infant monitoring.

Explore how alarm fatigue influences care giver behavior in the NICU.
