Cincinnati Children's

International Health Services

Offering Comprehensive International Travel Preparation and Vaccinations

International Health Services is a new offering at Cincinnati Children's that offers travelers comprehensive preparation and vaccinations before going abroad. This service is available for both adults and children.

We educate travelers on the most up-to-date travel related health issues, provide appropriate immunizations, and assess potential health risks while traveling. We provide medical follow-up care for travelers who should come home ill.

We work with individuals of all ages regarding their travel needs including:

- Preparing for travel for international adoption
- Business
- Leisure
- Mission trips
- School trips
- Individuals with special medical needs

International travel puts you at increased risk for conditions not typically seen in the United States. Travel education and preparation are essential components for having a successful trip. We offer appointments at two convenient locations:

- Liberty Campus: Mondays 8 AM - 4 PM
- Burnet Campus: Wednesdays 8 AM - 11 AM
- Burnet Campus: Fridays (1st and 3rd) 9 AM – 12 NOON

To be seen by International Health Services, individuals do not need to be current patients at Cincinnati Children's. Individuals should check with insurance provider regarding coverage for the visit.

To discuss your upcoming travel needs, to make an appointment or for questions, call or email:

- Robin Gordon at 513-636-2152
- robin.gordon@cchmc.org
- Community providers also can fax a Request for Specialty Services form (white) and check International Adoption Center. Please write "International Health Services" in free text section.
