Credit Card type: ☐ Mastercard ☐ Visa ☐ AMEX

Name (as it appears on credit card): _____Expiration Date: _____

Credit Card number: _____ 3 Digit Security Code: _____

Billing address: _____ Signature: _____

Sample Shipping Information

Send samples Monday through Thursday overnight to:

The Heart Institute Diagnostic Laboratory
Cincinnati Children's Hospital Medical Center
240 Albert Sabin Way, S4.381
Cincinnati, OH 45229

Samples in RNA*later* preferred (call for supply)

RNA*later* Solution: The specimen should be cut into slices no more than 0.5cm across, if necessary, and immediately placed in a minimum of ten sample volumes of RNA*later* solution (Qiagen Cat. #: 76154 or 76163). Samples in RNA*later* can be stored up to 7 days at 18-25 ° C or up to 4 weeks at 4°C and shipped at room temperature.

Snap-frozen Specimens: Tissue samples cut into slices no more than 0.5cm across should be immediately placed into a sterile collection tube and then snap–frozen by placing the tube in liquid nitrogen. Once the sample is completely frozen (10-15 minutes), it should be stored at -80°C, on dry ice, or in liquid nitrogen until processed. Alternatively, if liquid nitrogen is not available, the sample can be immediately frozen using a dry ice/alcohol bath. Specimens that are snap-frozen should be shipped on dry ice using an overnight courier service.
