| Specialty Practice Observation | 4 hrs/wk (26 wks)<br>(104 hrs) |
| Total hours | 2575-2604 hrs |

***Shared clinic time constitutes time where the resident and clinical director/mentor are in the clinic together with a shared or separate case load where the residency director is able to observe and/or share in the clinical decision making of the resident. The mentor will be available during these clinical times to assist in patient care and for consultation; however this will not be included in the designated 150 hours of 1:1 clinical mentoring.**

**** Clinical mentoring constitutes 1 on 1 meeting of the residency director with the resident to discuss clinical performance as well as address questions or difficult patients with the resident. During patient care interactions, the resident will be the primary provider of care (with the mentor present and unopposed by other patient care) for a minimum of 100 hours. The additional 50 hours will inlcude 1:1 discussion regarding patient care/management and direct patient care when the mentor is the primary provider. This time will be either daily or weekly based on the needs of the resident.**
