What is REDCap?

- REDCap is a secure web application for building and managing online surveys and databases.
- Allows for rapid set-up and development for your clinical study needs
- The UC Health- CTO is assisting our departments with streamlined forms and processes to help expedite the study lifecycle
- The best part of this software.... **IT'S FREE!**

Identify study tracking resources within REDCap

Let's go down the yellow brick road of a study and find out how REDCap can make your wish come true...

Follow the Yellow Brick Road
Research 2012: We're Not in Kansas Anymore
Cincinnati Children's

1. Originally, you get contacted by a sponsor regarding a new study.

Follow the Yellow Brick Road

**Research 2012:
We're Not in Kansas Anymore**

2. You Begin the Study Start up Process

Follow the Yellow Brick Road

**Research 2012:
We're Not in Kansas Anymore**

**3. The Contract is negotiated and executed.
The study is submitted to the IRB and approved.**

Report Generation

- Create and generate your study check book
- Subject demographics or their visit history through a study
- Time-stamped views of your study
