

CINCINNATI PEDIATRIC RESEARCH GROUP
Minutes of the Meeting
August 26, 2003

IN ATTENDANCE:

Jeanie Bailey, CCRP	Manny Doyne, MD
Jeralyn Bernier, MD	Catherine Hughes, MD
Matt Cornish, MD	Terry Langheim, MD
Jim Davis, MD	Bob Siegel, MD
Tom DeWitt, MD	Phil Walson, MD

I. ADMINISTRATIVE

1. Dr. Bernier presented marketing materials that the administrative staff has been working on. The items presented were a poster with tear-off cards for the CHIRP study and a CPRG brochure for conferences and mailings. Dr. Bernier and Jeanie Bailey have also been working with Ron Bryson, Pediatric Informatics, to re-design our website.
2. The group was reminded of the Ohio Pediatric Research Consortium (OPRC) meeting in October. The Dayton PBRN will be hosting the event. For more information contact Susan Howard at 937-641-3277.

II. STUDIES UNDERWAY

1. CHIRP Study
Dr. Siegel reported that we have 12 referrals with 4 patient visits completed. Our goal is to recruit 150 patients over the coming months. Providers that are participating to date are St. Luke Pediatrics, Hyde Park Pediatrics, Hopple Street Neighborhood Health Center, Pediatric Associates of Montgomery, and Whole Child Pediatrics. Call Colleen Fitzpatrick at 636-7036 to participate or refer a patient.
2. ADD Studies
The PIs are actively writing 2 papers for the community management survey and the electronically entered patient encounters. They will also be working on an abstract for the Pediatric Academic Societies meeting in May 2004.

III. DEVELOPING STUDIES

1. Obesity Study - The community survey about diagnosis and management was presented to the group for their comments. A paper version will be mailed to community members, and participating CPRG members will enter both management and patient encounter surveys electronically through a link on the CPRG web-site. Dr. Joseph is the Principal Investigator for this project.
2. Surveillance - Jeanie Bailey is calling members to set up an appointment for a site visit. She and Dr. Bernier or Dr. Siegel will assess your hardware needs for this project and demo the surveillance software. Dr. Camille Graham has agreed to be the community PI for the surveillance project.

IV. NEW/PROPOSED STUDIES

1. AAP eQIPP

Bill Brinkman, a fellow from the Division of General and Community Pediatrics, is interested in researching outcomes of the Education in Quality Improvement for Pediatric Practice (eQIPP) tool. He will be working with Drs. Bernier, Lanphear, and Baker in General Pediatrics as well as the AAP CME team. CPRG members interested in the eQIPP quality improvement CME tool should contact Dr. Bernier.

2. Atkins Diet

Dr. Siegel and Steve Daniels are interested in studying an Atkins-like diet in the pediatric setting. They are working on a protocol to enlist 50 obese patients ages 12-18 who have failed traditional dieting methods.

3. Mayerson Project

Neal Mayerson, of the Mayerson Foundation, has approached Drs. DeWitt and Bernier about an evaluation of his on line parent coaching tool, AboutMyKids.com. He would like to present it to community providers, and you will likely hear more about this in the future.
