

Pediatric Urologists- Plan to attend the upcoming...

The Pediatric Pelvic Floor A Comprehensive Surgical and Management Workshop on the Clinical Aspects of Pelvic Floor Reconstruction

Led by Alberto Peña, MD and Marc Levitt, MD
Colorectal Center for Children
May 12-14, 2010 *or*
November 3-5, 2010

Join us for a workshop featuring discussion of cloaca, urogenital sinus with normal anus, newborn management of anorectal malformations, bowel management for fecal incontinence and antegrade continence enema procedures, cloacal exstrophy, and more. There will be a special emphasis on the urologic aspects of the care of anorectal malformations. Topics will include reconstructive strategies for the pediatric floor, associated anomalies, and iatrogenic GU malformations in patients with a history of ARM. The workshop includes live operating room demonstrations.
