## Pediatric Education for the Prehospital Professional (PEPP)

The PEPP course was designed by the American Academy of Pediatrics (AAP) to give the prehospital professional the education and confidence they need to effectively treat the pediatric patient.

PEPP offers vital information for anyone who is involved in the care of children in the prehospital setting. With the combination of didactic as well as “hands on” practical sessions this course is a welcomed training in EMS.

### Audience

Registrants must be physicians, nurses, paramedics, emergency medical technicians, or other health care personnel, whose occupation requires managing the pediatric patient.

PEPP represents a comprehensive source of prehospital medical information for the emergent care of infants and children. It will teach prehospital professionals how to better assess and manage ill or injured children.

### CME / CEU Information

Children’ Hospital Medical Center is accredited by the State of Ohio Board of EMS to provide Continuing Education Credit. (Ohio Accreditation # 1238)

### **PEPP ALS**

PEPP ALS is a two day course that offers the paramedic, nurse, and the physician an opportunity to increase their skills and knowledge of prehospital pediatric care. This is accomplished by combining “hands-on” skills stations, interactive scenarios, and lectures.

### **PEPP BLS**

PEPP BLS is a one day course that offers Emergency Medical Technicians the opportunity to increase their knowledge and skill level on treating the pediatric patient in the prehospital setting. Lecture, interactive scenarios, and “hands-on” sections make up this course.

### **PEPP Refresher**

This is a 5 hour course that reviews the principles of PEPP and discusses the latest updates regarding the emergency care of the pediatric patient.
