Do You or Your Child Have Asthma? Do You or Your Child Take an Oral Steroid Every Day for that Asthma?

Asthma Medication Research Study

What
This is a research study to learn more about the safety and effectiveness of a drug called mepolizumab in treating asthma. Researchers want to know if mepolizumab can lower the amount of oral steroids a person needs to take to treat their asthma.

Who
Children, teens and adults 12 years old and older who:

• Have asthma
  
  AND

• Take steroid medicine by mouth (orally) every day to treat their asthma

Pay
Participants may be paid up to $465 for completing all study visits.
