

Ultrasound Exam Emergent/Urgent Add-On Requests For Community Providers

Process:

- The provider's office contacts ultrasound directly at (513) 636-3177 (follow the prompts for same-day appointment requests).
- Ultrasound staff work with provider's office to identify a time/location for the patient to be seen (see table below).
- Do not fax the order to our referral team; we will provide the fax number based on which location the patient will be seen.
- The provider's office contacts the patient/family with the appointment details and prep instructions.
- **Please note:**
 - If we do not have an appointment time available, we may instead ask that the patient arrive as soon as possible to be worked in.
 - Same-day add-on appointments may be limited or unavailable in the evenings or on weekends depending on outpatient registration availability and volume of pending emergent requests.

Same Day (Emergent)	ASAP (Urgent)
Scrotal w/Doppler • Concern for Testicular Torsion or Rupture	Abdomen • Acute symptoms of Cholecystitis or Biliary Disease
Pelvis (TABD or TV) w/Doppler • Concern for Ovarian Torsion	Pelvis (TABD or TV) • Concern for PID/TOA
RLQ/Appendix	Abscess • Head/neck, Buttocks, etc.
Incarcerated Hernia (Scrotal/Inguinal/Abdominal)	DVT
Intussusception	Pylorus (through 6 months of age)
Hip Effusion	Renal • Acute symptoms of Nephrolithiasis (stones)/Obstruction
Limited Abdomen • Concern for intrabdominal mass (palpable on clinical exam)	

Exams listed above as ASAP (Urgent) may be added on the same day or be deferred to the next available appointment depending on patient acuity.
