Division Data Summary

Research and Training Details

Number of Faculty	25
Number of Joint Appointment Faculty	2
Number of Support Personnel	79
Direct Annual Grant Support	\$1,085,841
Direct Annual Industry Support	\$38,760
Peer Reviewed Publications	73

Clinical Activities and Training

Number of Clinical Staff	2
Number of Clinical Fellows	10
Inpatient Encounters	2005
Outpatient Encounters	11,212

Division Highlights

Anderson

Anderson J, Beekman R, Uzark K, Marino BS Predictors of poor interstage growth in infants with a single ventricle. *Congenital Heart Disease* 2009;4:63-65.

(National presentation at the Section on Cardiology and Cardiac Surgery of the American Academy of Pediatrics National Conference and Exhibition, Boston, MA, 2008, 1st Place Young Investigator Competition)

Marino

Tomlinson RS, Ittenbach R, Wernovsky G, Helfaer MA, Mahony L, Newburger J,

Mussatto K, Tong E, Jacobs JP, Buchakjian E, Drotar D, Marino BS.

Indicators of disease severity predict long-term quality of life in the pediatric cardiac surgical population. Ped Crit Care Med 2009 (In Press)

(National presentation at the 7th Pediatric Cardiac Intensive Care Symposium, Miami, FL, 2008, Awarded Outstanding Abstract for Poster Presentation)

Faculty Members

Towbin Jeffrey, MD, FAAP, FACC, FAHA, Professor ; *Executive Co-Director, The Heart Institute; Director and Chief, Division of Cardiology*

Research Interests: Cardiomyopathy and Genetics

Robert Beekman, MD, Professor ; *Co-Medical Director, Cardiology*

Research Interests: Cardiac Catheterization & Intervention, Quality Improvement, Coarctation of the Aorta

D. Woodrow Benson, MD, PhD, Professor ; *Director, Cardiovascular Genetics*

Research Interests: Cardiovascular Genetics

Randal Claytor, PhD, Adjunct Associate Professor

James F. Cnota, MD, Associate Professor Clinical

Research Interests: Fetal Cardiology

Linda H. Cripe, MD, Associate Professor Clinical

Research Interests: Cardiomyopathies, Neuromuscular Disorders, Echocardiography

Richard Czosek, MD, Assistant Professor

Research Interests: Cardiac pacing devices in pediatric and congenital heart disease patients and arrhythmia risk stratification in the pediatric population

William Gottliebson, MD, Assistant Professor Clinical ; *Director, MRI Cardiology*

Research Interests: Cardiac MRI techniques to evaluate myocardial function, synchrony, and energetics.

Haleh Heydarian, MD, Instructor Clinical

Research Interests: Echocardiography synchrony/strain imaging

Robert B. Hinton, MD, Assistant Professor

Research Interests: Cardiovascular Genetics & Developmental Biology

Russel Hirsch, MD, Associate Professor Clinical ; *Director, Cardiac Catheterization Lab*

Research Interests: Cardiac Catheterization & Intervention, Device Development

Kan Hor, MD, Assistant Professor Clinical

Research Interests: MRI technology to diagnose and follow heart disease, in particular DMD cardiomyopathy.

Holly M. Ippisch, MD, Instructor Clinical

Research Interests: Echocardiography, preventative cardiology and pediatric obesity.

Thomas R. Kimball, MD, Professor ; *Co-Medical Director, Cardiology; Director, Cardiac Ultrasound; Director, Cardiovascular Imaging Core Research Lab*

Research Interests: Echocardiography, Ventricular function, Cardiovascular Effects of Obesity and Type II Diabetes.

Shelley Kirk, PhD, RD, LD, Assistant Professor Clinical

Research Interests: The efficacy, safety and feasibility of interventions for the management of pediatric obesity.

Timothy Knilans, MD, Associate Professor Clinical ; *Director, Electrophysiology & Pacing*

Research Interests: Identification and risk stratification of causes of sudden death.

Catherine Krawczeski, MD, Associate Professor Clinical ; *Director, CICU*

Research Interests: The effects of cardiopulmonary bypass and postoperative physiology on extra-cardiac organ systems in the pediatric cardiac surgical patient.

Ryan Leahy, MD, Instructor Clinical

Angela Lorts, MD, Assistant Professor Clinical

Research Interests: Heart failure and myocardial remodeling

Bradley S. Marino, MD, MPP, MSCE, Associate Professor ; Director, Heart Institute Research Core

Research Interests: Outcomes Research

Richard A. Meyer, MD, Adjunct Professor

Research Interests: Adult Congenital Heart Disease and Marfan/EDS

Erik Michelfelder, MD, Associate Professor ; Director, Fetal Cardiology

Research Interests: Fetal Cardiology and Echocardiography

Robert Spicer, MD, Professor ; Co-Director Fellowship Program; Medical Director, Cardiac Transplantation Program

Research Interests: Heart Failure Transplant

Elaine Urbina, MD, Associate Professor

Research Interests: Relating non-invasive vascular measures of carotid ultrasound, arterial stiffness and endothelial function to conditions such as CV risk factors, obesity, diabetes, renal disease and sleep disorders.

Karen Uzark, PhD, Associate Professor ; Director, Cardiac Process Improvement & Clinical Effectiveness

Research Interests: Heart Transplant, Quality of Life, Outcomes in Children with Heart Disease

Joint Appointment Faculty Members

Jeanne James, MD, Research Associate Professor

Molecular Cardiovascular Biology

Molecular cardiology and animal models of cardiac disease.

Ware Stephanie, MD, Assistant Professor

Human Genetics

Cardiovascular Genetics

Clinical Staff Members

- **Lisa Lee, MD**

Trainees

- **Jeff Anderson, MD**, PL7, UNC Hospital, Chapel Hill, NC
- **Allison Divanovic, MD**, PL7, Cincinnati Children's Hospital/University of Cincinnati
- **Jamie Sutherell, MD**, PL7, Washington University/St. Louis Children's, MO
- **John Hambrook, MD**, PL6, Eastern Virginia Medical School, Norfolk, VA
- **David Crowley, MD**, PL5, Barbara Bush Children's Hospital, Portland, ME
- **Sean Hagenbuch, MD**, PL5, Baystate Medical Center, Springfield, MA
- **Steven Kindel, MD**, PL5, Children's Memorial Hospital, Chicago, IL
- **Chike Madueme, MD**, PL4, Cincinnati Children's Hospital/University of Cincinnati
- **Mark Norris, MD**, PL6, Cincinnati Children's Hospital/University of Cincinnati
- **Matt Zussman, MD**, PL4, UNC, Chapel Hill, NC

Significant Accomplishments

The Heart Institute Research Core (HIRC)

In the 2008-2009 Fiscal Year, The Heart Institute (HI) began strategic planning for the Heart Institute Research Core (HIRC).

The Vision of HIRC is "HIRC will accelerate innovative clinical and translational research to make the HI the world leader in improving outcomes for pediatric cardiovascular disease and disease risk".

The Mission of HIRC is "HIRC supports innovative clinical and translational science by facilitating the design of research processes, the implementation of research plans, the dissemination and application of findings and the development of research professionals".

The goals for HIRC include:

Increase productivity of high quality innovative research.

Develop national and international reputation for the Heart Institute.

Facilitate research that will ultimately improve patient outcomes and experiences.

HIRC will become increasingly self supporting over time.

Develop a clearly defined research process that supports the education, development and productivity of HIRC professionals.

Develop guidelines, approved by Heart Institute research leadership, to equitably allocate resources.

Design and implement a dynamic infrastructure, including the identification of current and future space needs that facilitates the achievement of research and scholarly goals.

Facilitate collaboration among specialties within the HI, as well as across the medical center and pediatric community worldwide.

Develop the personnel both within HIRC and the HI who will provide teaching and education support for translational and clinical research.

HIRC's organization design team is currently researching best practices with internal and external organizations to create a robust infrastructure for the conduct of pediatric cardiovascular research. HI investigators will have access to HIRC resources beginning Fall 2009.

The Development of the The Center for Better Health and Nutrition

The Center for Better Health and Nutrition is the comprehensive obesity treatment, management and prevention arm of the Heart Institute at Cincinnati Children's. The center will focus on patient care, education and research. Prior to the new center, overweight children were seen in several different clinics, including the Comprehensive Weight Management program, HealthWorks! and the Abnormal Weight Gain Clinic. All these services will now fall under the umbrella of the new center. It is planned to have clinics of the Center of Better and Nutrition at the satellite facilities of CCHMC to make the program more accessible. It is the goal to develop the Center for Better Health and Nutrition into a nationally recognized center for excellence in obesity management, clinical obesity research and education and clinical services for health and activity.

New Programs

New programs have been developed in the Division of Cardiology including the Pediatric Cardiomyopathy and Heart Failure Service directed by Dr. Jeffrey Towbin, Cardiovascular Genetics Service co-Directed by Dr. Stephanie Ware and Dr. Towbin, and the Better Health and Nutrition Program directed by Dr. Bob Siegel. In addition, the Cardiovascular Diagnostic Laboratory, which will provide genetic testing for cardiovascular disease as well as viral genome testing of heart for myocarditis and transplant rejection, as well as other tissue and fluid specimens, has been developed under the direction of Drs. Towbin and Ware. Dr. Cong Liu has been recruited as Associate Scientific Director of this Laboratory.
