☐ Targeted (family specific) mutation analysis for _____ gene
If testing was **not** performed at CCHMC, please include proband's report and at least 100ng of proband's DNA to use as a positive control.

Proband's name _____

Proband's DOB _____

Proband's mutation _____

Please call 513-636-4474 to discuss any family-specific mutation analysis with genetic counselor prior to shipment.

Either Hearing Loss Panel Tier 1 or OtoSeq Hearing Loss Panel ** is indicated for patients with sensorineural hearing loss of unknown etiology who have had no previous genetic testing. OtoSeq® Hearing Loss Panel may also be used as follow-up testing in patients with normal *GJB2* or Hearing Loss Panel Tier 1 test results.

Please see our website, www.cincinnatichildrens.org/hearing-loss, for complete information.

[1]Deletion/Duplication analysis of *WHRN* is not available at this time.

[††]Whole exome sequencing (WES) orders require a signed WES Consent Form and completion of the WES Test Requisition. Also, inclusion of biological parental samples is strongly encouraged to assist with the analysis of WES and to increase test yield. Please visit our website at www.cincinnatichildrens.org/exome to obtain the required documents. WES testing will NOT be started until all forms are completed and received by the lab.
