

### **Prescriptions / Lab Test Results**

You need to ask for prescriptions or medication refills at the time of your child's clinic visit. You can always check with the pharmacy before the visit to check on the number of refills you have left. If you need to call the office for a refill, please have the following information available:

- Name of the medicine
- Amount your child takes and how often
- Pharmacy phone number

Lab test results can be reviewed also at the time of your child's clinic visit. Sometimes the doctor may ask that you call to check or discuss the results. Usually the scheduling coordinator or secretary will take your name and number and the nurse or doctor will return your call.
