

The **Cincinnati Breast Cancer and the Environment Research Program (BCERP)** is a joint effort of researchers from the University of Cincinnati and Cincinnati Children's Hospital Medical Center with local breast cancer advocates and their community, support, and service organizations. We are working together on two projects.

In Growing Up Female (GUF), we are using epidemiology research methods to study how environmental and genetic factors impact the start of puberty and other potential milestones in young women.

In the Community Outreach and Translation Core (COTC), we are working toward best practices for educating breast cancer advocates, study participants, the general public, and policy makers about the research findings and their implications for personal health and public health policies.

"Looking Upstream for Environmental Links to Breast Cancer" is your opportunity to hear firsthand about research findings of the Cincinnati BCERP and national leaders.

During the course of our research, we have gathered interesting and important data that we are excited to share with our community.

Contact hours (3.3) will be awarded to nurses who attend the entire program and complete an evaluation tool.

Cincinnati Children's Hospital Medical Center (OH-046/ 9-1-2015) is an approved provider of continuing nursing education by the Ohio Nurses Association (OBN-001-91), an accredited approver by the American Nurses Credentialing Center's Commission on Accreditation.

Karen Joy Miller (left) is the founder and president of Huntington Breast Cancer Action Coalition, Inc., a grassroots community organization established in 1992. She has been an advocate for public health since her diagnosis of breast cancer in 1987.

Laura Weinberg (right) is president of the Great Neck Breast Cancer Coalition (GNBCC). She has been working on local, state, and national projects pertaining to breast cancer and the environment for more than 20 years.

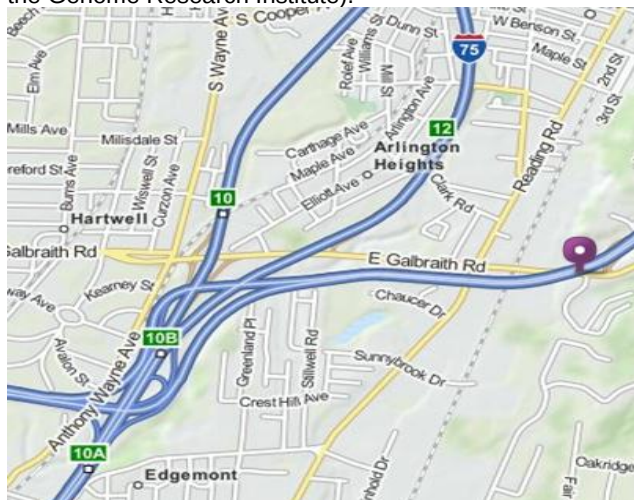

This community program is presented by one of the programs affiliated with the **Cincinnati Breast Cancer and the Environment Research Program (BCERP)** at Cincinnati Children's Hospital Medical Center and the University of Cincinnati. The Cincinnati BCERP is one of three epidemiology studies of puberty in the country sponsored by the National Institute of Environmental Health Sciences and the National Cancer Institute to advance scientific understanding of this topic. Each BCERP project is charged with educating the non-scientific public on its research findings and fostering communication between the community's breast cancer advocates and the research investigators.

You can learn more about our program at <http://www.cincinnatichildrens.org/research/divisions/b/cberp/default/>

Support for this program has been provided by the National Institute of Environmental Health Sciences and the National Cancer Institute through grant NIEHS ES019453 and the Cincinnati Center for Environmental Genetics (NIEHS P30 ES006096).

How to get to the UC Reading Campus (formerly known as the Genome Research Institute).

#### Directions to 2180 E Galbraith Rd 45237:

**If taking 75 North:** Exit 10B Galbraith Rd (left lane exit). End of ramp turn right onto Galbraith Rd. Continue through Reading Rd intersection. Entrance is on the left after the railroad tracks.

**If taking I-75 South:** Exit 10 Galbraith Rd. End of ramp turn left onto Galbraith Rd. Continue through Reading Rd intersection. Entrance is on the left after railroad tracks.

**If taking Ronald Reagan/Cross County:** Exit Reading Rd/Galbraith Rd. End of ramp turn right onto Galbraith Rd. Entrance is on the right before railroad tracks.

**If taking I-71 South:** Exit 14 Ronald Reagan/Cross County westbound turn right at end of ramp. Continue to Reading Rd/Galbraith Rd. exit. End of ramp turn right onto Galbraith Rd. Entrance is on the right before railroad tracks.

Free onsite parking. Online registration is encouraged. **Please register by March 30, 2014.** Space is limited. For more information call (513) 636-8307.
