What

The purpose of this research study is to collect long-term outcome data about individuals with sickle cell disease (SCD) and sickle cell trait.

Why

This research study is being conducted to improve the health care, support services, follow-up care, education and counseling that individuals with SCD and sickle cell trait receive in order to help them to make informed health-related decisions.

Who

Children and adults who have sickle cell disease or sickle cell trait and receive services at the Comprehensive Sickle Cell Center at Cincinnati Children's may be eligible to participate.

Details

For more information, contact the Sickle Cell Research Office at sicklecell@cchmc.org or 513-636-6770.
