

As part of the Critical Care Building Project, the Northern Avenue garage located behind the Medical Office Building (3430 Burnet Ave) will be also under construction from October 2017 – December 2018 to add 1,100 parking spaces.

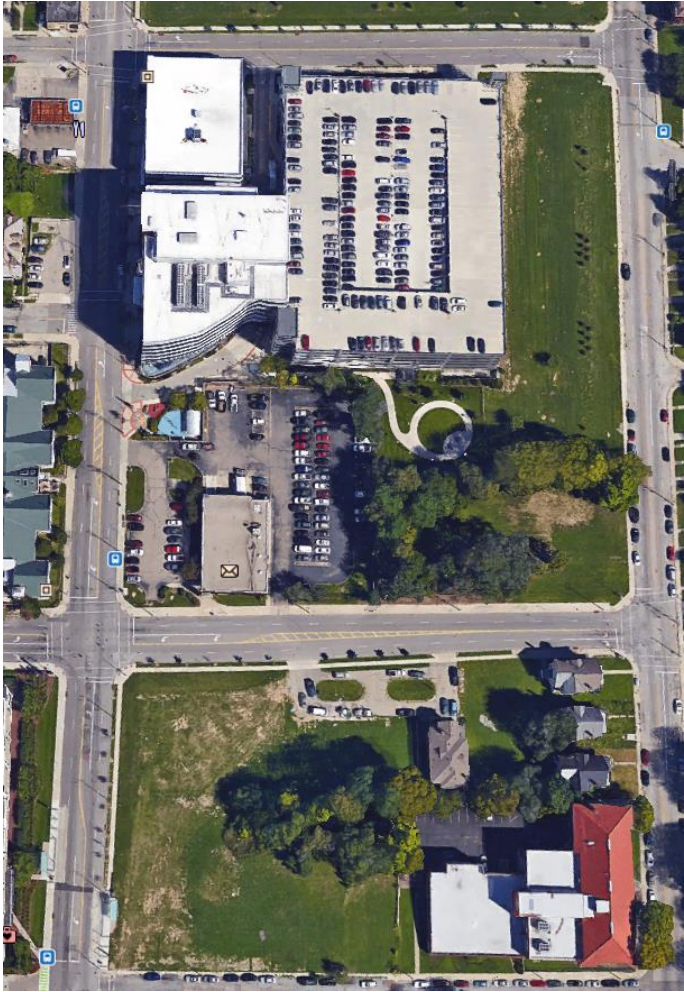

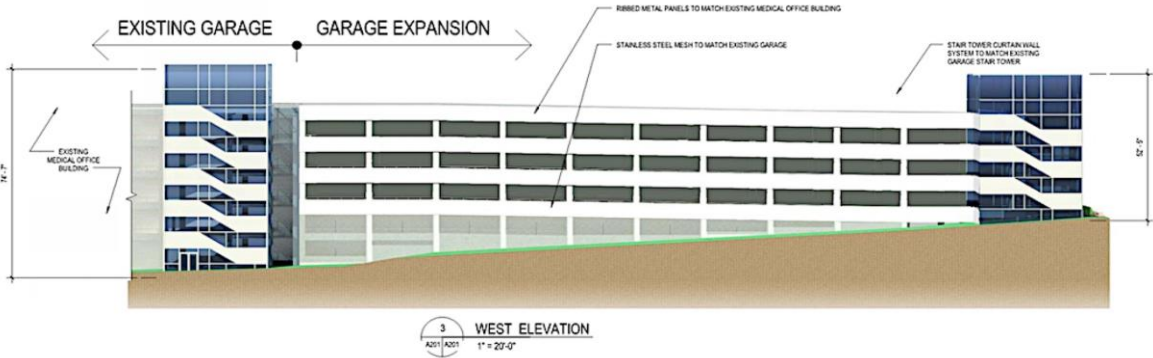

Please be aware that there will be construction vehicles and noise starting at 7:00am each day. The bulk of the construction work that involves loud noises will occur in October of 2017. There will be minimal disruption to parking spaces and access to the building. If you have patients that are sensitive to noise or construction related activities, this information should be communicated ahead of visit if possible.

For more information, families can visit the [Critical Care Building Expansion page](#) on the Cincinnati Children's Medical Center website.
