Before agreeing to a blood product transfusion for me/my child, it is important that I discuss the needs, risks and benefits with my/my child’s physician. For more information, I have been given a pamphlet that discusses these items and choices other than blood product transfusions. I understand that no guarantee or promise can be made regarding the results of the transfusion therapy. I understand that in an emergency situation, the person caring for me/my child may have to give blood products immediately without my express permission. I understand that this consent only covers blood products from the CCHMC Blood Bank.

I, ___________________________ voluntarily consent for me/my child ___________________________ to receive blood product transfusion therapy as part of the treatment of my/my child’s disease or surgical condition as described below:

RIGHT TO REFUSE: I understand that I am free to refuse a transfusion. However, I understand that I should first discuss this with my physician and my family and look into the other choices.

SIGNATURES: By signing this consent form I am giving permission for transfusion of blood products:

Until the date of _____ / _____ / _____ (Unless otherwise noted, this consent will expire one year from the date of patient/parent/legal guardian signature) for the medical condition described above.

I understand that I may remove my consent at any time. I am aware that I should always discuss any planned transfusion with the physician ordering the transfusion and/or my/my child’s physician to be sure that I understand the need for the transfusion. I have had the chance to ask questions. By signing, I confirm to the best of my knowledge that the law allows me to consent to the procedure(s) for this patient.
