

# Are You An Adult with Asthma? Do You Use an Inhaler?

Investigational Asthma Medication Research Study

change the outcome®

CCHMC IRB #2012-1422: V1

## What

The purpose of this research study is to evaluate the safety and effectiveness of an investigational medication. The study will examine whether this medication is beneficial in improving lung function in patients with moderate to severe asthma and compare its effectiveness among certain types of patients.

## Who

Adults 18 to 65 years old who:

- Have been diagnosed with moderate or severe asthma
- Are on an inhaled corticosteroid (like Flovent, Advair, etc.)

## Pay

Participants may receive compensation for their travel and time.

## Details
