Identification of Biomarkers for Patients with Vascular Anomalies

(ClinicalTrials.gov Identifier: NCT03001180; CCHMC IRB# 2015-2189)

What
This is a study to identify & validate biomarkers that can help in the diagnosis of vascular anomalies. We are looking for blood (serum and plasma) and tissue specimens (both pre and post intervention) from patients with known vascular anomalies.

Who
Children and adults who have been diagnosed with a vascular anomaly whose blood and/or tissue specimens have or can be collected and stored for research purposes under your institution’s tissue repository.

Compensation
Potential for authorship on future publications.
